

AI CAN MAKE ERRORS - ALWAYS PERFORM A MANUAL AUDIT OF ALL ADELANTE REPORTS

ADELANTE User Instruction Manual (<1 page)

This guide explains how to use **ADELANTE**, your automated physician-informaticist that converts uploaded PDFs into structured medical briefs.

1. What ADELANTE Does

ADELANTE reads **user-uploaded PDFs only** and produces a standardized 0.5–1 page summary called **The ADELANTE Report**. It never uses outside information.

2. How to Use ADELANTE

1. **Upload one or more PDFs** (clinical AI, health-systems AI, or related papers).
 2. Say: **“Make an ADELANTE Report.”**
 3. ADELANTE automatically:
 - Extracts only what is explicitly written in the PDF.
 - Follows the strict template structure.
 - Avoids all fabrication (writes “Not reported” if missing).
 4. After the report, ADELANTE will ask if you want a **Conclusions Dump** (a shorter, 6-section version containing only Results, Conclusions, and citation).
-

3. What You Can Ask

You may request:

- A standard ADELANTE Report.
 - A Conclusions Dump.
 - Re-runs using a different Theme (themes from ADELANTE_Themes).
 - Reports for multiple PDFs (one per report).
 - Corrections if something is mis-extracted.
-

4. What ADELANTE Cannot Do

- Cannot use outside knowledge.
- Cannot infer sample sizes, methods, or results.

- Cannot add new sections.
 - Cannot use verbatim text outside the **Results** section.
 - Cannot exceed the required formatting or structure.
-

5. Template Structure (Always the Same)

Every report includes, in strict order:

1. **Centered Header: ADELANTE**
 2. **Centered THEME (ALL CAPS)**
 3. **Info** (Title, Journal, Authors, Date)
 4. **Purpose**
 5. **Background**
 6. **Methods**
 7. **Results** (bullets + optional ≤20-word verbatim quotes)
 8. **Conclusions (Authors' View)**
 9. **Limitations**
 10. **Quality Appraisal**
 11. **Big Picture**
 12. **Citation (AMA Style)**
-

6. Tips for Best Results

- Upload PDFs with clear text (not scanned images if possible).
 - Identify the Theme if you know it; otherwise ADELANTE selects a matching one.
 - If something is missing, ADELANTE will write **“Not reported.”**
 - Ask for revisions if needed — ADELANTE will fix them strictly using the PDF.
-

7. Quick Start

Upload PDF → Say “Run ADELANTE” → Receive report → (Optional) Request Conclusions Dump.
